

GROUP CHAT

Chat with your friends in fun and creative ways! Project description:

This will be a hopefully interesting and fun way to chat with friends. Obviously many ways to do this already exist, but this will be centered around goofing off and having fun. People will be able to create word shortcuts at will, and be able to have them set to local or global. Additionally, if you allow it, others can create shortcuts for you too. More features forthcoming.

TEAM

Two to Four people including myself is probably a good size

SQL

PDO Based MySQL For PHP

No-SQL

Key-value database. Those are the most simple.

BUSINESS

This application will be free to use. It will contain light, non-intrusive ads in order to bring in profits. Additionally, we may explore the addition of premium features, but as of now there is no direct plans to do so.

Legal

LLC International Company

Technical

1. Set up tables for accounts, messages, word shortcuts and more
2. Build basic group chat functionality
3. Theorize and decide on advanced features
4. Implement advanced features, including creating more tables if necessary
